

Unit – 3

1. Explain the construction of decision trees for classification with an example.
2. Discuss Multi-Class Classification using the Naïve Bayes Classifier with an example.

Unit – 4

1. Derive and explain the Perceptron Learning Algorithm.
2. Explain the Support Vector Machine algorithm for linearly separable data.

Unit – 5

1. Describe the K-Means Clustering Algorithm with an example and its limitations.
2. Explain the Agglomerative Hierarchical Clustering algorithm step by step with a diagram
